Rooftops and CDK Accounts

Eight locations, eight accounts, and why they do not map one to one

DOCUMENT
EgD-HAW-CDK-REC-004 · revision 1

CLIENT CONTEXT
Peterbilt Atlantic — eight locations, five provinces — eight CDK accounts on invoice 10002236

COMPANION TO
Corrects EgD-HAW-CDK-PLUG-001, -OUT-002 and -OUT-003

PREPARED BY
EVEglyph Design

STATUS
Reconciliation and correction notice. Supersedes the nine-rooftop figure used in EgD-HAW-CDK-PLUG-001, -OUT-002 and -OUT-003.

Pour le bien-être du peuple.

1. The count

Peterbilt Atlantic operates eight locations across five provinces. The dealership states this on its own website and lists them by name on the locations page:

#	LOCATION	PROVINCE	HST/QST REGIME
1	Hanwell (head office)	New Brunswick	HST 15%
2	Moncton	New Brunswick	HST 15%
3	Dartmouth	Nova Scotia	HST 14%
4	Kentville	Nova Scotia	HST 14%
5	Charlottetown	Prince Edward Island	HST 15%
6	Deer Lake	Newfoundland and Labrador	HST 15%
7	Saint-Pascal	Quebec	GST 5% + QST 9.975%
8	Saint-Louis-du-Ha! Ha!	Quebec	GST 5% + QST 9.975%

Eight locations. Five provinces: NB, NS, PE, NL, QC. This is the dealership's own published figure and it is the number to use.

CDK invoice summary 10002236 bills eight accounts. Eight and eight is a coincidence of totals, not a mapping. As §3 shows, the accounts do not correspond one-to-one with the rooftops.

Correction to earlier internal analysis

Two figures previously circulated internally are withdrawn:

- **"Nine rooftops."** This appeared in the July vault analysis as *"a group understood to run nine rooftops"* — an assumption, not a sourced count. It was then repeated as fact in three subsequent documents. The dealership publishes eight. **The correct figure is eight.**
- **"Seven rooftops billed."** The same analysis reported the invoice covering *"7 of the group's 9 rooftops."* Both halves of that statement were wrong.

2. The eight accounts as billed

CDK invoice summary 10002236, dated 2026-03-31, header account A173552. All figures CAD, March 2026.

ACCOUNT	NAME AS PRINTED	RECURRING	TAX	TOTAL	EFFECTIVE TAX RATE
A173552	Peterbilt Atlantic	5,894.24	884.16	6,778.40	15.00%
A192555	Peterbilt Atlantic	1,978.09	276.94	2,255.03	14.00%
A193706	Peterbilt Atlantic – Charlottetown	1,621.55	243.23	1,864.78	15.00%
A240448	Peterbilt Atlantic	1,955.95	293.39	2,249.34	15.00%
A299578	Peterbilt Atlantic	1,990.30	278.64	2,268.94	14.00%
A173553	Peterbilt New Brunswick (Moncton branch)	21.50	3.23	24.73	15.02%

ACCOUNT	NAME AS PRINTED	RECURRING	TAX	TOTAL	EFFECTIVE TAX RATE
A173554	Peterbilt of Nova Scotia	1,939.54	271.54	2,211.08	14.00%
A258188	Peterbilt Quebec East	1,905.16	95.24 + 190.05	2,190.45	5.00% GST + 9.976% QST
	Current charges	**17,306.33**		**19,842.75**	

Past due, 1–30 days: **22,227.77**. Grand total outstanding: **42,070.52**.

Only three of the eight accounts carry a location or entity label. Four are printed as bare "Peterbilt Atlantic" with nothing to distinguish them from one another or from the header account.

3. What the tax lines reveal

Four of the accounts are unlabelled, but the sales tax rate applied to each one identifies its province of supply. That gives a partial mapping without needing anything from CDK.

RATE APPLIED	PROVINCE INDICATED	ACCOUNTS
HST 15%	NB, PE or NL	A173552, A193706, A240448, A173553
HST 14%	**Nova Scotia only**	A192555, A299578, A173554
GST 5% + QST 9.975%	Quebec	A258188

This does not reconcile. Three accounts are taxed at the Nova Scotia rate, but Peterbilt Atlantic has two Nova Scotia rooftops. One account carries Quebec tax, but there are two Quebec rooftops. The totals happen to land on eight; the structure underneath does not.

Best available reading, stated as inference rather than fact:

ACCOUNT	MOST LIKELY	CONFIDENCE	BASIS
A173552	Hanwell head office, plus group-level services	Reasonable	Header account; 15% NB rate; recurring charge is 3× every other account
A173553	Moncton	**Confirmed**	Named on the invoice
A193706	Charlottetown	**Confirmed**	Named on the invoice
A240448	Deer Lake, or a second NB entity	Weak	15% only narrows it to NB, PE or NL; Charlottetown is already taken
A192555	Dartmouth or Kentville	Weak	NS rate, no label
A299578	Dartmouth or Kentville	Weak	NS rate, no label
A173554	Nova Scotia legal entity, not necessarily a rooftop	Weak	Named as an entity rather than a location; third NS-taxed account against two NS rooftops
A258188	Both Quebec rooftops on one account	Reasonable	Named "Quebec East"; only Quebec-taxed account; two QC locations exist

Not identifiable to any account: Saint-Pascal and Saint-Louis-du-Ha! Ha! individually, Deer Lake, and which of Dartmouth or Kentville is which.

4. Withdrawn finding — the HST rate is correct

Earlier internal analysis flagged the 14% rate on three accounts as a billing error, on the basis that Atlantic HST is 15%. **That finding is withdrawn. The 14% rate is correct.**

Nova Scotia reduced the provincial portion of HST from 10% to 9% effective 1 April 2025, giving a combined rate of 14% in Nova Scotia while New Brunswick, Prince Edward Island and Newfoundland and Labrador remained at 15% — confirmed by the Canada Revenue Agency's rate guidance and CRA Notice 342 on the transitional rules.

CDK has applied the correct rate in every province on this invoice. Raising it as an error would have been wrong, and would have cost credibility on the accounts where there is a real question.

5. What is actually worth asking

Two genuine anomalies survive scrutiny. Neither is an accusation; both are ordinary questions a dealer group asks about its own bill.

The Moncton account bills $21.50 a month

A173553, explicitly named "Peterbilt New Brunswick (Moncton branch)," is charged **$21.50** in recurring fees. Every other operating account on the invoice sits between $1,621 and $1,990. Moncton is a real, staffed location.

Three possible explanations, all of which matter:

- Moncton's DMS is billed inside A173552, which would explain that account being three times the size of its peers — and would mean the head-office account is carrying charges for a rooftop.
- Moncton runs on something other than CDK Drive, and $21.50 is a residual line for a single retained service.
- Moncton is under-billed, in which case a true-up is coming.

Four accounts have no label

A192555, A240448, A299578 and the header A173552 are printed identically as "Peterbilt Atlantic." There is no way, from the document the dealership receives, to tell which location or entity each one represents, or whether any of them is a rooftop at all rather than a holding entity or a parts-only sub-account.

This is a consequence of the summary invoice format: no SKU, no quantity, no unit price, no service description — only an account-level recurring total. The dealership cannot verify what it is paying for at any location, and cannot allocate cost to the rooftops that incur it.

The two questions

> 1. *Please confirm which physical location each of these eight accounts corresponds to: A173552, A192555, A193706, A240448, A299578, A173553, A173554 and A258188 — against our eight locations at Hanwell, Moncton, Dartmouth, Kentville, Charlottetown, Deer Lake, Saint-Pascal and Saint-Louis-du-Ha! Ha! Where an account covers more than one location, or covers no location, please say so.*
>
> 2. *A173553 is labelled as the Moncton branch and carries $21.50 in monthly recurring charges, against $1,600 to $2,000 on our other operating accounts. Is Moncton's DMS billed through another account, and if so which one?*

Both are answerable from CDK's own account records in a few minutes. Neither reveals anything about what the dealership intends to do with the answer.

6. Why this had to be settled before Monday

The location count and the account mapping appear in the opening line of every message going to CDK and PACCAR this week. Sending a vendor an incorrect count of your own dealerships in the first sentence forfeits the standing that makes the rest of the request work — it invites the reader to check everything else, and it moves the conversation from *"help us understand our environment"* to *"you don't appear to understand your own."*

The count is now sourced from the dealership's own published record rather than from an internal assumption. Every document in this set has been corrected to eight.

---

7. Provenance and corrections issued

Location count and names: the Peterbilt Atlantic locations page, corroborated by the dealership's home page stating eight locations in five provinces. Account figures: CDK invoice summary 10002236, dated 2026-03-31, header account A173552, held in the compliance vault. Tax rates: CRA guidance as cited in §4. Effective rates in §2 are computed from the invoice's own recurring and tax columns.

Corrected in this revision, from nine rooftops to eight: the PACCAR Feedback Standard, the outreach reframe, and the Monday approach.

The error originated here, not in the source documents: the vault analysis said "understood to run nine rooftops," which is a flagged assumption, and it was carried into three published surfaces as though it were established. It was corrected only after the operator queried it a second time.
